

# CERTIFIED NEUROINTERVENTIONAL CLINICIAN Rapid Review Course and Certification Exam

HOTEL VALENCIA RIVERWALK | 150 EAST HOUSTON STREET  
SEPTEMBER 8-10 2022 | SAN ANTONIO, TEXAS

The Certified Neurointerventional Clinician (CNIC) board certification examination was developed to recognize the unique and essential contributions of clinicians in neurointerventional radiology. Attainment of CNIC certification demonstrates expertise in stroke competencies, including understanding and mastery of skills used to diagnose stroke, evidence-based management principles for both ischemic and hemorrhagic stroke, and knowledge of peri-procedural management of stroke or the at risk stroke patient. Upon completing the review course, an examination will be offered in-person or can be scheduled to be taken at a Prometric Test Center near you.
